

OneHorn

GARUDA^{FX}

Heavy cultivator for various types of soil cultivation

Designed for efficient and uniform soil cultivation, Garuda FX delivers smooth operation across a variety of field conditions. With better coverage and ease of use, it helps save time, reduce tractor load, and improve productivity with every pass.

Salient features

Protective springs absorb shocks and prevent damage, ensuring longer machine life

Three rows of widely spaced working organs provide better soil flow and effective operation without clogging

Rubber protection for discs reduces wear and tear while enhancing durability and safety

Roller type

CAGE

V-RING

MODEL	GARUDA FX – 300	GARUDA FX – 350
Number of tines	10	12
Required power (hp)	115-130	120-170
Working width (m)	3.00	3.50
Transport width (m)	3.20	3.70
Weight with cage roller (kg)	1796	1948
Weight with V-ring roller (kg)	1962	2166

*Specifications are indicative and subject to change at any time.

Working width: **3.0 meters / 10 shanks** | **3.5 meters / 12 shanks**

About OneHorn

OneHorn is built to make agriculture more productive, reliable, and rewarding for farmers. Backed by the 65-year manufacturing legacy of NIPHA Group, OneHorn brings proven engineering strength and trusted quality to the field. Our machines are designed with a clear focus on value-driven pricing, ensuring farmers get the right performance at the right cost, without compromise. At the core of OneHorn is a commitment to strong ethics and transparency, so every product delivers consistent performance you can rely on season after season. With a deep understanding of real agricultural needs, OneHorn is not just offering machinery — it is enabling farmers to work smarter, improve productivity, and build a more secure future.
